

Dear Students and Parents,

March 16, 2021

It's SCIENCE FAIR TIME!!

This year, the SCIENCE FAIR will be held on **Wednesday, April 21<sup>st</sup>**! Students who participate **MUST** register no later than Wednesday, April 14<sup>th</sup>.

## **How does my child sign up?**

This year, registration will be done electronically here: [t.ly/LxVS](https://t.ly/LxVS) Where possible, each child who participates should register using his/her school email account. Students can log in to this account by navigating to [mail.washk12.org](mailto:mail.washk12.org) using the same username as the LEXIA username with @washk12.org added to the end, and the password is also the same as LEXIA).

During the registration process, please pay close attention that there will be two categories this year: Experimental Design (traditional) and Engineering Design. Documents regarding these categories will be available during the electronic registration process.

Please understand that registrations will not be accepted after the Registration cut-off date (April 14<sup>th</sup>). Your best bet is to sign up as soon as possible!

**PLEASE NOTE:** Due to the COVID-19 pandemic, all projects must be created and submitted by video (suggested length being 1-4 minutes) with the student describing his or her project. Creating a science fair board will not be required. Details will be given to each registered student within 24 hours after registering.

Thank you for your involvement! If you have questions, please contact Mr. Lincoln Jones [lincoln.jones@washk12.org](mailto:lincoln.jones@washk12.org)  
BES Science Fair Coordinator

**REMINDER:** If you are doing the Achiever Medallion, you must do the Science Fair if you did not do a Reflections project earlier in the school year.
